## TECHNICAL DATA:

|                          |   |
|--------------------------|---|
| Physical state           | elastoplastic mass                          |
| Color                    | white                                       |
| Odor                     | no characteristics odor                     |
| Ignition temperature     | > 240 °C                                    |
| Solubility               | insoluble in water, soluble in hydrocarbons |
| Specific weight at 23 °C | 1,750 g/cm <sup>3</sup>                     |

## HOW TO USE:

Apply on dry surfaces and degreased, removing any excess after assembly.

## CONSERVATION:

If properly stored in a cool, dry place can last over 18 months. Once opened slowly begins to harden.

## PACKAGINGS:

Jar of 950 g, boxes of 18 pieces.
